Technical Project Manager and Software Engineer with 6+ years of experience leading software projects from planning to production while designing scalable backend applications using Python, FastAPI, and Django. Experienced in project planning, stakeholder management, Agile delivery, effort estimation, client communication, and leading cross-functional teams. Strong technical expertise in RESTful APIs, microservices, distributed systems, OpenAI APIs, Prompt Engineering, Retrieval-Augmented Generation (RAG), and LLM integrations.

PROFESSIONAL EXPERIENCE

Genboot **Mohali, India**
Project Manager *April 2024 – Present*

- Lead end-to-end delivery of multiple software projects from planning to production.
- Collaborate with clients and stakeholders to gather requirements, define project scope, and translate business needs into technical solutions.
- Manage project planning, sprint planning, effort estimation, resource allocation, cost estimation, and delivery tracking.
- Coordinate cross-functional teams, including frontend, backend, QA, UI/UX, and AI engineers.
- Monitor project progress, manage risks, and ensure timely milestone delivery.
- Drive Agile ceremonies including sprint planning, stand-ups, reviews, and retrospectives.
- Manage client communication, project status updates, production releases, and post-deployment support.

Genboot **Mohali, India**
Senior Software Engineer *May 2020 – April 2024*

- Developed scalable backend applications using Python, FastAPI, and Django.
- Designed and implemented RESTful APIs, microservices, and distributed systems.
- Built AI-powered applications using OpenAI APIs, Prompt Engineering, LangChain, and Retrieval-Augmented Generation (RAG).
- Developed high-performance backend services using PostgreSQL, Redis, and Celery.
- Collaborated with cross-functional teams to deliver scalable software solutions.
- Conducted code reviews, testing, debugging, and continuous performance improvements.
- Contributed to system architecture, production deployments, and technical documentation.

EDUCATION

Guru Nanak Dev University **Amritsar, India**
Master of Computer Applications (MCA) *May 2022*
9.17 CGPA

Guru Nanak Dev University **Amritsar, India**
Bachelor of Computer Applications (BCA.) *May 2020*
8.80 CGPA

P.S.E.B **Amritsar, India**
XII (Non-Medical) *May 2017*
82.6%

PROJECTS

ITC

Tech Stack: Python | React.js | Redis | Leaflet.js | Jest | React Testing Library

- Developed a scalable **traffic management platform** using **Python**, capable of processing real-time traffic data from multiple traffic cameras and microservices.
- Designed and implemented REST APIs and backend services to aggregate and process live traffic information from distributed systems.
- Integrated multiple **microservices** to collect and synchronize traffic events, vehicle counts, congestion levels, and camera metadata.
- Implemented **Redis caching** to improve response times and efficiently handle high-frequency real-time requests.
- Optimized backend services to efficiently process high-volume real-time traffic data while ensuring reliable API performance.

Sydkik

Tech Stack: Python | FastAPI | PostgreSQL | Redis | Celery | OpenAI | LangChain | Pinecone | Microsoft Graph API | Google Calendar API

- Developed scalable backend services using **Python** and **FastAPI** for an AI-powered executive assistant.
- Integrated **OpenAI APIs** to build AI email drafting, smart suggestions, meeting summaries, and productivity automation.
- Built calendar, email, and meeting workflows using **Microsoft Graph** and **Google Calendar** integrations.
- Developed REST APIs, asynchronous background jobs with **Celery** and **Redis**, and optimized **PostgreSQL** database performance.
- Implemented notification services, task automation, and secure API integrations while contributing to system design, code reviews, and production deployments.

Marina Mooring

Tech Stack: Python | React.js | Leaflet.js | Jest | React Testing Library

- **Developed and maintained a marina mooring management platform to streamline berth allocation and marina operations.**
- Built interactive map-based features using **Leaflet.js**, enabling users to visualize marinas, berths, and vessel locations.
- Implemented **marker clustering** to efficiently display and manage large volumes of location data while improving map performance and user experience.
- Integrated geospatial data and custom map layers to support real-time visualization and navigation.
- Developed scalable REST APIs and collaborated with backend services for seamless data integration.

Redscope

Tech Stack: React.js | Transformers.js | Web Workers | Small Language Models (SLMs) | Electron

- Developed the frontend of an Electron-based desktop application to help developers track and document issue resolution workflows.
- Built responsive and reusable UI components using React, ensuring a smooth and intuitive user experience.
- Participated in code reviews, testing, and Agile sprint planning to ensure high-quality software delivery.

Supplier Order Management

Tech Stack: Next.js | React.js | TypeScript | Tailwind CSS | MSAL.js | Microsoft Entra ID (Azure AD)

- Built the application **from scratch** using **Next.js** and **Tailwind CSS**, delivering a scalable and responsive web application.
- Implemented **Single Sign-On (SSO)** authentication using **Microsoft Authentication Library (MSAL)** with Azure Active Directory integration.
- Designed and implemented **Role-Based Access Control (RBAC)** to enforce secure authorization and role-specific access across the application.
- Developed robust **authentication and authorization** workflows, including protected routes, session management, and permission-based navigation.
- Designed and implemented a **work delegation module**, enabling users to assign, reassign, and track tasks efficiently across teams.
- Optimized application performance through server-side rendering, code splitting, and modern Next.js best practices.
- Participated in code reviews, testing, debugging, and deployment to ensure high-quality software delivery.

Technical Skills

1. Programming Languages: Python, JavaScript, TypeScript, HTML5, CSS3

2. Frontend: React.js, Next.js, Astro.js, Vanilla JavaScript, jQuery, React Query, React Testing Library, Jest

3. Backend: Python, FastAPI, Django, RESTful APIs, Celery, Microservices

4. State Management: Redux Toolkit, RTK Query, React Query

5. UI Libraries: Tailwind CSS, Material UI (MUI), Ant Design, Reactstrap, Bootstrap

6. Project Management: Agile, Scrum, Jira, Confluence, Sprint Planning, Project Planning, Stakeholder Management, Requirement Gathering, Risk Management, Resource Planning, Delivery Management, Cost Estimation, Team Leadership

7. AI & LLM: OpenAI API, LangChain, Prompt Engineering, Retrieval-Augmented Generation (RAG), Embeddings, Vector Search, Tool Calling, Pinecone, Ollama, Streaming APIs

8. Databases & Caching: PostgreSQL, PGVector, MySQL, SQL, Redis

9. Cloud & DevOps: AWS (EC2, ECS, SQS, SNS), Docker, Kubernetes, Linux

10. Tools: Git, DBeaver, MySQL Workbench
